FILE 'HOME' ENTERED AT 12:26:00 ON 25 OCT 2002

=> help files

The FILE command is used to select the file (database) for search, display, and printing. To use this command, enter "FILE" and the name of the file. Subsequent SEARCH, DISPLAY, PRINT, and ACTIVATE commands will be executed in this file until the next FILE command.

When you log in, you are automatically in the HOME file. Use the FILE command to change to another file. Enter "HELP FILE NAMES" at an arrow prompt (=>) for a list of the files that are available. For general information on the current file, enter "HELP CONTENT".

The costs of an online session can be designated, on your monthly invoice, as being associated with a particular individual or group. For information on this feature, enter "HELP FILE COST" at an arrow prompt (=>).

L3 ANSWER 1 OF 3 VETU COPYRIGHT 2002 THOMSON DERWENT

AN 1999-63635 VETU

TI Effects of supplementing the feed to Atlantic cod (*Gadus morhua*) fry with lactic acid bacteria and immuno-stimulating peptides during a challenge trial with *Vibrio anguillarum*.

AU Gildberg A; Mikkelsen H

CS Norwegian-Inst.Fish.+Aquacult.

LO Tromso, Nor.

SO Aquaculture (167, No. 1-2, 103-13, 1998) 4 Fig. 1 Tab. 19 Ref.

CODEN: AQCLAL

AV Norwegian Institute of Fisheries and Aquaculture, 9005 Tromso, Norway.  
(emailasbjg@fiskforsk.norut.no).

LA English

DT Journal

FA AB; LA; CT

AB The effect of a lactic acid bacteria (LAB) and **immunostimulating peptide** (fish protein hydrolysate) supplement on the response of Atlantic cod fry to a *Vibrio anguillarum* challenge is reported. In-vitro, the growth of *V. anguillarum* was inhibited by *Carnobact. divergens* isolated from cod and salmon. Feeding LAB and/or peptides had no effect on growth rates. Feeding LAB from both sources resulted in high pyloric ceca colonization and a significant number of LAB survived GI passage but only salmon LAB resulted in intestinal colonization. LAB from salmon and immunostimulating peptides reduced the cumulative mortality rate by day 12 but not by day 24 post-infection. There was no synergism or cumulative effects with LAB plus peptides.

L3 ANSWER 2 OF 3 VETU COPYRIGHT 2002 THOMSON DERWENT

AN 1994-63790 VETU

TI *Salmonella enteritidis* infection in poultry: current situation, diagnosis and control.

LA Flemish

DT Journal

FA AB; LA; CT

AB Since 1987 there has been a considerable increase in *Salm. enteritidis* infections in poultry in Europe and the U.S.A. with a concomitant increase in the incidence of human salmonellosis. This review surveys the epidemiology and the course of *Salm. enteritidis* infection and colonization in poultry, bacterial and serological methods of diagnosis and measures for prevention and control of the infections. The use of different vaccines, probiotics based on microbiological preparations, effects of feed constituents and the problems of antibiotic therapy are discussed in the context of control of infection. The emergence of programs for monitoring and control of *S. enteritidis* and *S. typhimurium* infection in poultry within the EU is cited.

LA English

DT Journal

FA AB; LA; CT

AB The isolation and activity of peptides from human and bovine milk proteins are reviewed. Peptides discussed include opioid peptides (beta-casomorphins, morphiceptin, exorphins, alpha-lactorphin and beta-lactorphin), opioid antagonist peptides (casoxin-A, -B, -C), ACE-inhibitor peptides (alpha-S1-casein, bovine beta-casein; CEI-12, -5, -beta-7), **immunostimulating peptides** (VEPIPY, GLF, LLY, TTMLPW, casomorphin-1-7, -1-8), casein phosphopeptides (CPP) and antithrombotic peptides (bovine kappa-casein and human fibrinogen alpha and lactotransferrin subunits). Peptides that inhibit acid and gastrin

secretion, stimulate DNA synthesis, inhibit chymosin activity and that have bactericidal activity were mentioned. (congress).
